Tutorial 11: Graph Analysis

## Assignment 11-1 Modularity

Figure 1: Example Graph
Compute the modularity Q according to the following partitionings of the graph $G(V, E)$ :

1. What do you expect to be the best partitioning of the graph? Why?
2. Remove edges $(C, D)$ and $(C, E)$ and compute Q for $s_{1}=\{A, B, C\}$ and $s_{2}=\{D, E\}$
3. Remove edge $(B, C)$ and compute Q for $s_{1}=\{A, B\}$ and $s_{2}=\{C, D, E\}$
4. Compare the results with your intention from subtask 1.

## Assignment 11-2 Betweenness

Consider the following graph:

Figure 2: Example Graph

Apply the Girvan-Newman Algorithm and compute the betweenness of paths starting at node $A$.
