Guidelines for the final exam

Date and Location

- The final exam will take place:
  Monday, July 23th 2018,
  from 11a.m. to 13p.m.
  in room B 101 (last names A-M) and B 201 (last names N-Z)
  LMU main building, Geschwister-Scholl-Platz 1, Munich.

- Please be there on time and look up the schedule of public transportation systems to be aware of any delays. When the final exam will have started (planned 11:15 a.m.), we are not allowed to let you in if you are too late.

- We ask you to leave your mobile devices at home or at least turn them off during the exam. If phone rings of if you are caught handling your device during the exam, you will automatically fail! When you sit down, please store your baggage/purse in the row in front of you.

- You have got 90 minutes for the exam.

Registration

- Please note that it is not sufficient to be simply registered for the course. You have got to register in addition for the final exam!

- If you are registered for the exam but you don't want to participate, please un-register via UniWorX in time. You can un-register till July 20th 2018, 11:55 p.m.. If you can't show up due to medical reasons, please hand in a medical report.

- If you need compensation for disadvantages (Nachteilsausgleich) or if you are eligible to an extension of writing time (Schreibzeitverlängerung), please contact us in advance until July 20th 2018, 11:55 p.m., so we can make preparations.

Identity number

Please bring with you your identity card (driver licence or passport are also fine) and your current student identity card or a valid certificate of matriculation.

Material and auxiliarly means

- Everything that has been discussed in the lecture or in the tutorials may be part of the exam!

- You won't write down any code, i.e. you don't need to learn the functions of keras/tensorflow by heart. As we said earlier, we don't want to focus on any specific programming language as the problems we've discussed can be solved in various ways with many different libraries.

- You don't need to learn the derivation of each presented formula, but you should - of course - know the basics, understand the formulas and be able to apply them like in the tutorials. The exercise sheets might be a good indicator.

- The only auxiliary that is allowed is a ruler. No other auxiliary materials are allowed. This includes books, lecture slides, notes, own sheets, mobile devices, smartwatches, laptops, tablets, calculators, etc.). In case of violation you will fail the exam.

- Mobile devices should be turned off!

- We will provide additional sheets if you need some.

- Please use a pen writing in black or blue. Not allowed are colours red and green (these are reserved for correction). Please don't use a pencil since it is not permanent and therefore invalid for answers. You might also bring a ruler and a second pen writing in a different colour.

Organization

- The exam will start at 11:15 a.m. If you are not present on time, you are not allowed to participate in the test.

- Please write down your name and your matriculation number on top of each sheet! If your exam comes apart it is crucial that the solutions can be assigned to you.

- You cannot hand us your test in the first and last 15 minutes of the exam. (In the first 15 minutes, we've got to check your identity number and we also don't want to bother anyone in the last 15 minutes. Please pay respect to other participants.)

- At the end of the exam, please stay at your place till we received ALL exams and at first then start to pack your things up.

Additional exam

There will be no additional exam!

Good luck!

Your Machine Learning Team :)
