

Second International ACM Workshop on Managing and Mining Enriched Geo-Spatial Data 2015 (GeoRich'15)

May 31th, 2015, Melbourne, Australia

<http://www.dbs.ifi.lmu.de/georich15>

held in conjunction with ACM SIGMOD 2015

Call for Papers

Both the current trends in technology, such as smart phones, general mobile devices, stationary sensors and satellites, as well as a new user mentality of utilizing this technology to voluntarily share information, cause the production of a huge flood of geo-spatial data. This data can integrate multiple other types of data, e.g., social information, textual data, multimedia data and scientific measurements, leading to what one can call generally as "enriched geospatial data". This flood of geo-referenced data provides a tremendous potential of discovering new and possibly useful knowledge. A novel research challenge is thus to search and mine this wealth of enriched geo-spatial data which requires joint effort from multiple research communities.

The aim of this workshop is to provide a unique forum for discussing in depth the challenges, opportunities, novel techniques and applications on modeling, managing, searching and mining rich geo-spatial data, in order to fuel scientific research on big spatial data applications beyond the current research frontiers. The workshop is intended to bring together researchers from different fields of data-science and geo-science that deal with the management of spatial and spatio-temporal data, social network data, textual data, multimedia data, semantic data and ontologies, uncertain data and other common types of geo-referenced data. In particular, submissions covering topics from the following non-exclusive list in the context of enriched geo-spatial data are encouraged:

- Data models and representation
- Uncertainty and user-generated content
- Quality control and assurance
- Data fusion techniques
- Privacy and confidentiality
- Synthesis of multi-source data
- Analysis of multi-source data
- Management of data
- Data stream management and mobile computing
- Spatial reasoning and analysis
- Data integration and extraction
- Data uncertainty
- Crowd-sourcing computing resources
- Non-traditional visualization techniques
- Data-mining and discovery
- Query processing
- geo-semantics and geo-ontologies
- geographic information retrieval

Important Dates

Abstract Deadline

02 March 2015

Paper Deadline

09 March 2015

Notification

14 April 2015

Camera-Ready

26 April 2015

Deadlines: 11:59pm PST

Steering Committee

Christian S. Jensen
Nikos Mamoulis
Mario A. Nascimento
Dimitris Papadias
Dieter Pfoser
Matthias Renz

General Co-Chairs

Kyriakos Mouratidis
Matthias Renz

Program Co-Chairs

Tobias Emrich
Krzysztof Janowicz
Andreas Züfle

Publicity/Sponsoring Chair

Panagiotis Bouros

Proceedings Chair

Leong Hou U

Webmaster

Klaus Schmid

Program Committee

(Preliminary)

Benjamin Adams
Farnoush Banaei-Kashani
Panagiotis Bouros
Muhammad Cheema
Reynold Cheng
Michael Gertz

Gabriel Ghinita
Ralf Hartmut Güting
Erik Hoel
Tomi Kauppinen
